

T.C of calc. height = $O(n)$

Diameter of B.T :-

(n^2)
 $d = l + h + 2$

Pair of
int h;
int d;

```
public static Pair diameterPair(Node node) {
    if (node == null) return new Pair(h-1, d-0);
    Pair l = diameterPair(node.left);
    Pair r = diameterPair(node.right);
    int currDia = l.h + r.h + 2;
    int h = Math.max(l.h, r.h) + 1;
    return new Pair(h, Math.max(currDia, Math.max(l.d, r.d)));
}
```

$$3 + 2 + 2 = 7$$

$$(4, 3) + 1 = 5$$

House Robbery in BT :-

Pair of
rob :-
no rob;

Pair sol (root)
if (root == null) return Pair(0, 0);

$l = \text{sol}(\text{root.left})$
 $r = \text{sol}(\text{root.right})$
 $\text{currRob} = \text{root.val} + l.\text{noRob} + r.\text{noRob};$

$\text{currNoRob} = \text{Math.max}(l.\text{rob}, r.\text{rob}) + \text{Math.max}(l.\text{noRob}, r.\text{noRob});$

0,0 0,0

0,0 0,0

currRob = 1; currNoRob = 0; Math.max(1, 0); return new Pair(currRob, currNoRob);

-2 + 2
